Reel & photo ad pack: 5 products

Each product has 2 photo ads for Feed and Stories (4:5), a Reel hook frame (9:16), two timed Reel scripts with Hinglish voiceover, and ready-to-paste Meta copy. The photo ads use DeoDap's own product photos. Shoot the Reels yourself on a phone, with a real unit in hand.

1 · Heating belt | 2 · Scalp massager | 3 · Tyre booster | 4 · Galaxy projector | 5 · USB juicer | Test plan

Hook in 2 seconds

Open on the problem or the wow moment. No logo, no intro.

Burn in captions

Most people watch Reels muted, so every line of voiceover also goes on screen.

Keep the bottom 35% clear

Instagram's buttons and caption cover it. Put text in the upper-middle.

Real hands, real room

Phone camera, daylight, an Indian home. Phone-shot ads usually beat polished studio footage.

Notes before it goes live

Meta health policy. Don't say "Do you have period pain?" or "your cramps". Meta rejects ads that name a viewer's health condition. Say "for cramp days" instead. No cure or medical claims.

Best angle. Hot water bag vs belt. Two stores (PlentyBuy, Bekabee) already lead with this, which tells you it works.

Notes before it goes live

Skip hair-growth claims. Competitors promise hair regrowth. Meta may reject that claim, and buyers return the product when their hair doesn't grow. Sell relaxation and gifting.

Photo check. DeoDap's photo shows another brand's box (Bluedea) in the corner. Crop it out, or ask DeoDap for a clean photo.

Notes before it goes live

> **Test it yourself first.** Try it on your own bike and scooter. Confirm which tyre sizes fit before you claim "all bikes".

> **Why it's a bet.** No one is advertising this in India, so there are no competitors but also no proof it sells. Keep it at ₹500 a day until it gets sales.

HOW TO RUN THEM

Test plan

Structure. One campaign per product, Sales objective, Advantage+ audience. Run 3 ads per product: Reel A, Reel B and Photo 1. Spend ₹500–700 a day per product for 3 days before you judge anything.

Kill rules. Pause an ad if the cost per link click is above ₹25, or if ₹600 is spent with no add-to-cart. Pause a product if ₹1,500 is spent with no purchase.

Scale rule. If ROAS (sales revenue per ₹1 of ad spend) stays above 3.0 for 3 days, raise the budget 20–30% a day. Copy the winning Reel with 3 new hooks instead of making new videos from scratch.

Cutting returns. Give ₹50 off for prepaid orders, confirm every COD order on WhatsApp before you ship, and block pincodes that keep refusing deliveries.

Calendar. Belt, massager and booster start in Week 1 of Nov. Push gifting creatives across 21 Nov – 13 Dec (wedding dates) and Christmas. The projector starts 1 Dec and the juicer 26 Dec.

Before spending. Order 1 unit of each from DeoDap and shoot your own Reels. Check the product works as the listing says. Ask DeoDap whether you may use their photos in ads.

Photos in the photo ads are DeoDap listing images (deodap.in), used here as drafts. Prices: COD is the main price, and prepaid gets ₹50 off. A struck-through price is shown only where DeoDap's MRP is above the selling price. Never show a "was" price above the printed MRP. Competitor and demand notes come from the Meta Ad Library (India, active ads), checked 30 Oct 2026.
